ABOUT ME

Full-Stack Developer experienced in building scalable web applications using MERN stack and AWS. Skilled in microservices, distributed systems, caching, and CI/CD pipelines with strong problem-solving ability.

TECHNICAL SKILLS

- **Languages:** C++, Java, SQL, JavaScript, TypeScript
- **Frontend:** React, TailwindCSS, HTML/CSS, Framer Motion, AntD
- **Backend:** Node.js, Express.js, REST APIs, Authentication, Authorization, MVC, Microservices, Load Balancer
- **Databases:** MongoDB, MySQL
- **Cloud & DevOps:** AWS (S3, EC2, Lambda, VPC), Docker, Nginx, CI/CD, GitHub Actions
- **Caching:** Redis
- **Tools:** Git, Postman

PROJECTS

AlgoVista

[GitHub](#)

- Engineered a scalable DSA learning platform with structured roadmaps, real-time visualizers, mentorship modules, and RBAC, enabling personalized learning, progress tracking, and guided mentorship while reducing onboarding time by 40%.
- Integrated a Judge0-based code execution engine supporting 3+ languages with real-time submissions.
- Built CLI-based automation for Super Admin creation and service orchestration, enabling faster system initialization.
- Implemented payments, cloud storage, and authentication using Razorpay, Cloudinary, and JWT.

Tech Stack: React, TailwindCSS, Node.js, Express, MongoDB, Judge0, Razorpay, JWT, Cloudinary, Nodemailer

ReserveX

[GitHub](#)

- Developed a web application for corporate workspace seat allocation and time-slot distribution, enabling efficient hybrid office scheduling.
- Engineered conflict-free booking logic to handle concurrent requests and prevent double-booking.
- Implemented RBAC and real-time updates to streamline seat management for admins and employees.

Tech Stack: React, Node.js, Express, MongoDB, Redis, Socket.io, JWT

Cloud-Native Deployment Pipeline

- Designed and deployed a microservices-based application using Docker containers with centralized service orchestration.
- Built a CI/CD pipeline using GitHub Actions to automate build, test, and deployment workflows.
- Configured Nginx reverse proxy and managed containerized services, improving deployment consistency and scalability.

Tech Stack: Docker, Docker Compose, GitHub Actions, Nginx, AWS EC2, Redis

CureSync — Healthcare Platform

[GitHub](#)

- Developed a multi-tenant healthcare platform with role-based dashboards for hospitals, doctors, and patients.
- Enabled real-time appointment booking, notifications, and EHR management with secure storage.
- Integrated billing and Payment systems using Razorpay.

Tech Stack: React, TailwindCSS, Node.js, Express, MongoDB, Redis, Socket.io, Razorpay, Bcrypt, JWT

ACHIEVEMENTS

- 2nd Place — IEEE & Coding Ninjas CodWar 5.0

EXTRA-CURRICULAR ACTIVITIES

- Member of IEEE and CSI Club

EDUCATION

Chitkara University

B.E. Computer Science (CGPA: 9.36)

2023 – 2027

Himachal Pradesh, India

Gobardhanpur Pramathanath Vidyayatan

Class XII (72.4%)

2023

West Bengal, India

Saharada Kalipada Vidyapith

Class X (82.86%)

2021

West Bengal, India
